

FOREHEAD

Who would've thought? Botox, a weakened form of the deadly food poisoning botulism, is now the dish du jour at skin treatment joints all across town. Injections paralyze the teeny muscles near your crow's feet and your "angry" lines (the vertical ones between the brows). Chelsea Eye's **Dr. Joseph Eviatar** (212.727.3717) can also wipe out horizontal forehead creases (\$400-\$700) with just a few pokes of his trusty beauty syringe.

EYES AND EYELIDS

Ever heard that Dorothy Parker line, "Men never make passes at girls who wear glasses"? Well, it goes both ways, four-eyes. So, if you're near-sighted, far-sighted or have a nasty astigmatism, there's hope. With LASIK, a painless, seconds-long procedure, you'll be able to put those Paul Smith glasses away for good. **Drs. Christopher Coad** and **Joseph Eviatar** have wielded the miraculous laser (\$1,950 per eye) thousands of times at Chelsea Eye. Dr. Eviatar, a specially trained eye plastic surgeon (\$2,000 - \$5,000), can also zap those round-the-clock bedroom eyes. Droopy eyelids? Blepharoplasty!

CHEEK

Sure, facial hair can cover up bad skin, but c'mon—no one swoons for the Grizzly Adams look nowadays. If you want to hold your head high as you bare your cheeks, go for a deep pore facial or a chemical peel. Chelsea Eye's dermatologist **Dr. Christopher Nanni** or **Carole Burns**, a state-licensed aesthetician, will delicately blast away sun damage, acne scars, and uneven coloration with laser treatments (\$1,550 - \$3,000).

TEETH

Are your pearly whites more like putrid yellows? Point your driver to cosmetic dentist **Dr. Ziba Yaghmai**, D.D.S. (212.370.0013), who can adjust your smile to Bright in no time. If you prefer to whiten *chez vous*, Dr. Yaghmai can create a set of do-it-yourself custom teeth molds (\$350 - \$500 per arch). Happy bleaching.

SKIN/FACE

Hook nose? Sagging skin? Get your imperfect self over to plastic surgeon **Dr. Robert Guida** (212.727.3717) who surely has the facial implant just for you. Besides the supplemental contours, his specialties include rhinoplasty, liposuction, and brow, eye, and deep plane face lifts—all done in the back office surgery suite. Brad Pitt jaw, Billy Crudup cheekbones to order. Fees vary.

—Mark Silver

HAIR

Hair transplants have always been a hot resort, with good reason: you don't end up looking like a doll-head. But that's no longer the bald truth, thanks to **Dr. Walter Unger** (212.249.9393), a pioneer in the fine art of creating undetectable, micro- and mini-graft implants (\$8,500 - \$16,000 per treatment). But don't wait until your noggin looks like a cue ball—Dr. Unger has a three to six month waiting list.

LIPS

Believe it or not, fat can be beautiful—when put in the right places. Injections of the reviled guck (\$900 and up) can add subtle or dramatic contour to your jawline or cheek. Under **Dr. Lawrence Bass's** (212.593.2600) skilled hand, fat can also be strategically inserted to plump lips into a pout that could make Jonathan Rhys Meyers jealous.
